Map Information:

This map represents the percentage of unduplicated clients with a primary diagnosis of opiate use disorder (OUD) served in each county during SFY 2016. The average rate of clients with a primary diagnosis of OUD across counties was 49.9%. The highest rates were found in Lawrence county (80.4%), Scioto county (79.6%), and Hardin county (74.6%). The lowest rates were found in Paulding county (27.8%), Geauga county (28.2%), and Coshocton county (30.2%).

Counties that reported fewer than 25 clients are signified by gray, and no rate is given. Counties with 25-49 clients are signified by diagonal lines.

County borders are outlined in gray. ADAMHS Boards areas are outlined in black, and may overlap county borders.
