Learning Objectives by Presentation:

**Psychopharmacology of HIV**

- Define the classes of anti-retroviral medications (ART) used to treat HIV
- Identify the interactions between ART and commonly used psychotropic medications
- Define the interactions between ART and commonly used non-prescription psychotropic agents

**Depression: Medication Review and Updates**

- Review medications for depression
- Update audience on newer antidepressants
- Review pros and cons of various antidepressants

**Dementia: Behaviors-Risky Targets**

- Recognize dementia-related behaviors responsive to pharmacotherapy
- Select appropriate medications to reduce the impact of such behaviors on caregiving
- Identify the risks of pharmacological treatment of dementia-related behaviors

**Chemical Dependence**

- Define the neurocircuitry of addictive disorders
- Identify the principles of pharmacotherapy currently available
- Discuss and interpret emerging research and innovations in the field

**Interpersonal Psychotherapy for Depression**

- Describe the theoretical background of IPT and how it differs from Dynamic Interpersonal Therapy
- Describe the interpersonal inventory
- Describe the 4 IPT problems areas and strategies for addressing them

**Trauma-Informed Therapy for Children and Teens**

- Describe the definition of trauma
- List 3 ways trauma impacts a youth's ability to function
- List 3 ways trauma-informed treatment is different (and more appropriate for traumatized children) from traditional therapy
