May 29, 2015

>>> Deadline Extended to June 10 for SBIRT Project
The Ohio SBIRT (Screening, Brief Intervention and Referral to Treatment) Project is seeking partners to implement SBIRT services at medical sites in Ohio. We are seeking up to six primary care sites, e.g. FQHCs, doctor’s offices, family practices and up to two hospital-based sites. Funds will be used to implement screening for substance use, depression and tobacco use during the course of primary medical care. Sites will use the AUDIT, DAST-10 and PHQ-9 screening tools alongside a tobacco screening tool to identify patients and conduct brief interventions using motivational interviewing. Training for staff is included in the grant funding to equip them to identify those at risk, provide evidence-based interventions and referrals when necessary. The third round of funding is available to new and returning sites for SFY 2016. All proposals must meet the guidelines and requirements of the RFP.

NOTE: The deadline for proposals have been extended from May 29 to June 10, 2015, at 5 p.m. The extension is intended to allow sites more time to complete the required documentation and to respond to all inquiries regarding the RFP.
