

Morphine Milligram Equivalents per Capita

Ohio's Automated Rx Reporting System - 2013

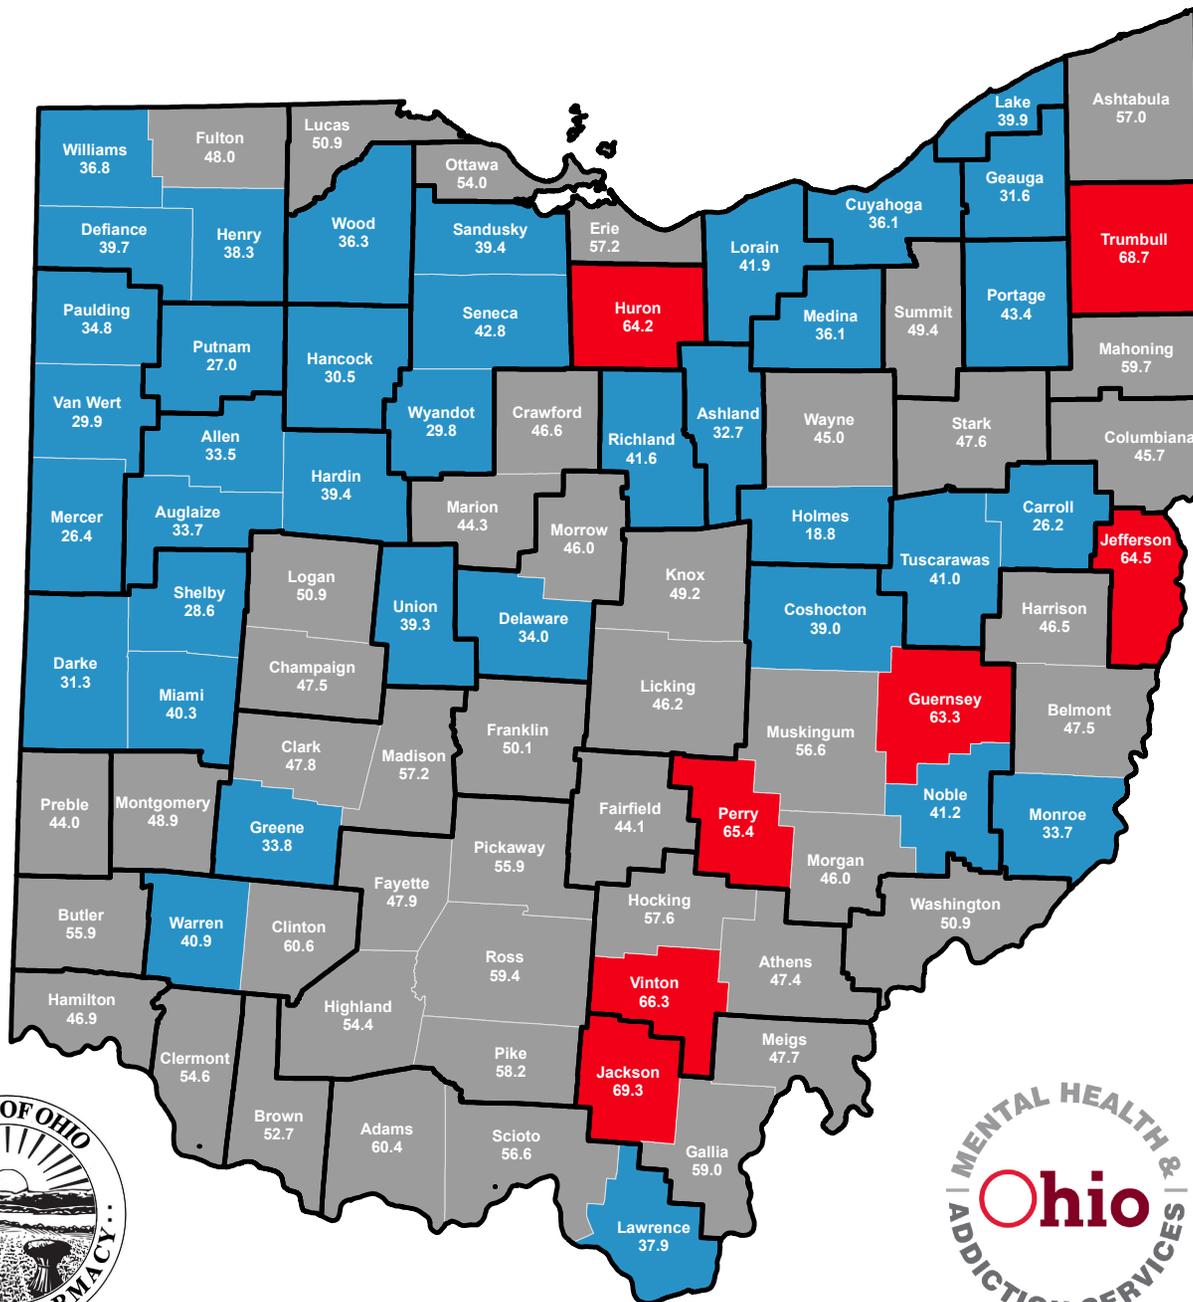

Legend

Map Information:

This map examines morphine milligram equivalents (MMEs) per capita in 2013. Most prescription analgesics in the OARRS system (>97%) have a morphine equivalence as established by the Centers for Disease Control. Enough analgesics were prescribed in Ohio for every man, woman and child to receive 46.0 mg of MME during the course of the year. Counties with the highest MMEs per capita were Jackson (69.3 mg), Trumbull (68.7 mg) and Vinton (66.3 mg). Counties with the lowest MMEs per capita were Holmes (18.8 mg), Carroll (26.2 mg) and Mercer (26.4 mg).

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
