

Morphine Milligram Equivalents per Script

Ohio's Automated Rx Reporting System - 2014

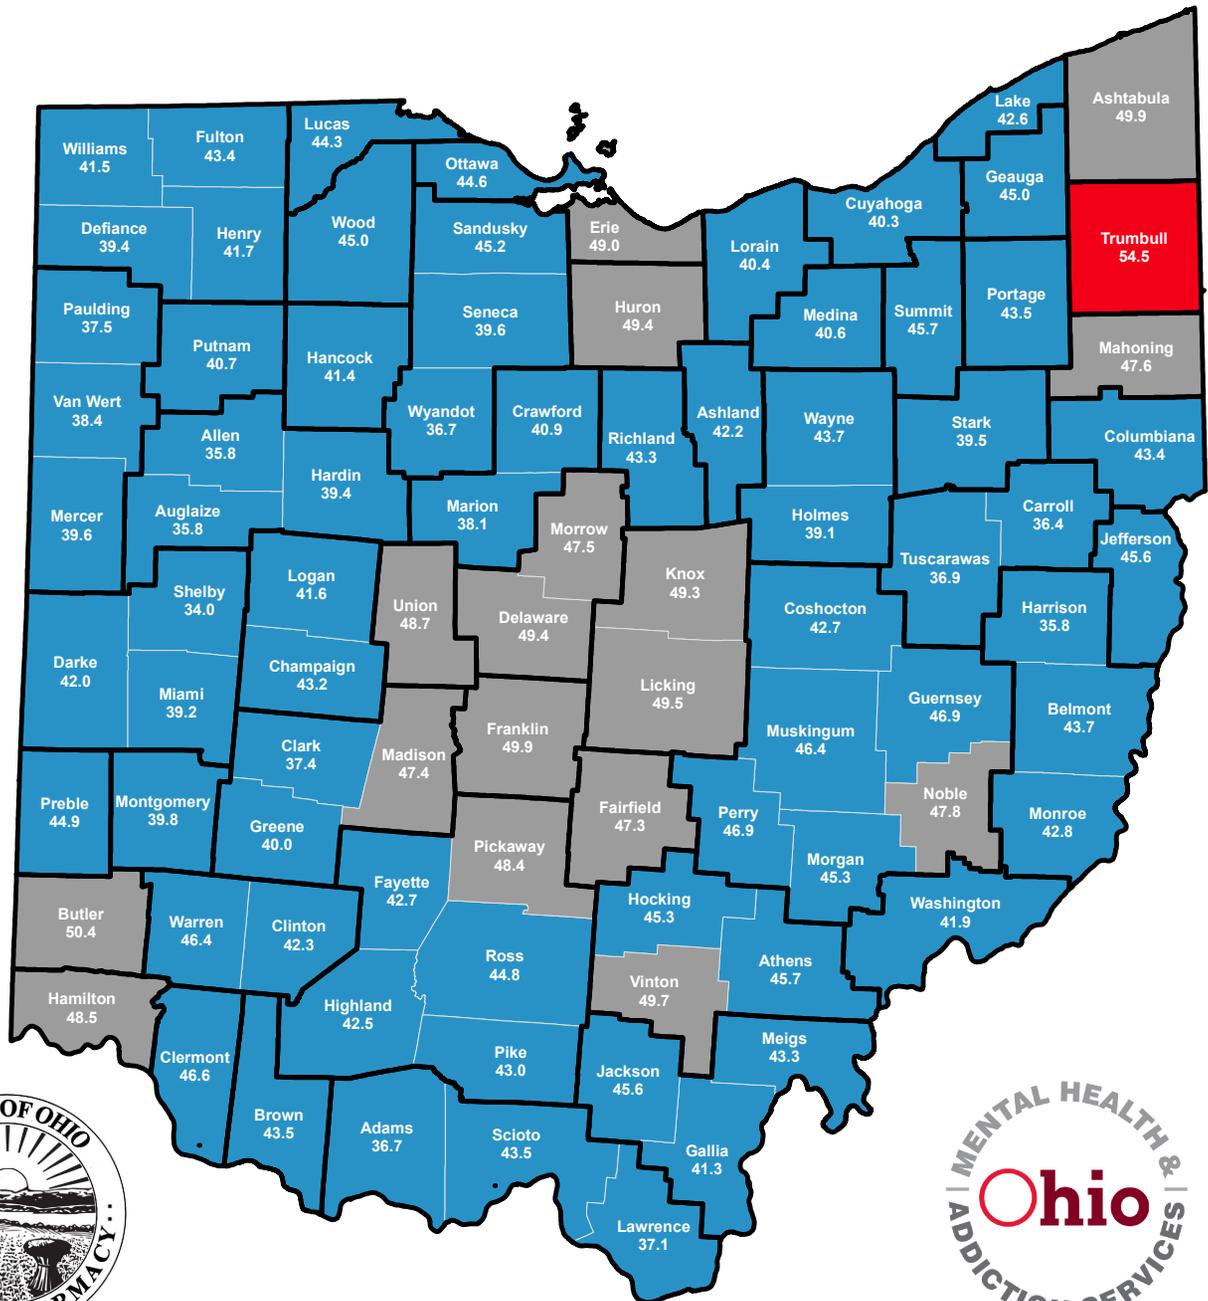

Legend

Map Information:

This map examines morphine milligram equivalents (MMEs) per script in 2014. Most prescription analgesics in the OARRS system (>97%) have a morphine equivalence as established by the Centers for Disease Control. On average, each prescription contained the 43.4 MME during this time. Counties with the highest MMEs per script were Trumbull (54.5 mg), Ashtabula (49.9 mg) and Mahoning (47.6 mg). Counties with the lowest MMEs per script were Shelby (34.0 mg) and Allen, Harrison, and Auglaize (all with 35.8 mg).

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
