

Change in Prescription Opioid Doses per Capita

Ohio's Automated Rx Reporting System - 2013 to 2014

Legend

 ADAMHS Board

Change (%)

 -16.9% - 0.0%

 0.1% - 2.0%

Map Information:

This map displays the change in per capita prescription opioid dosage rates from 2013 to 2014. On average the number of doses dropped by 6.8 percent. Most counties experienced a decrease in per capita rates. Counties with largest decrease in per capita rates were Noble (-16.9%), Morgan (-14.8%) and Guernsey (-12.9%). Holmes County was the only county with an increase in per capita doses (2.0%). Per capita rates are based on oral solids and transdermal patches. All opioid solutions and most buprenorphine combinations are excluded from the analyses except for Butrans, which is primarily used for pain management and not medication assisted treatment.

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
