NORC DSM-IV Screen for Gambling Problems

The screen is set up to run first a lifetime screen for all items and then ask about the past year only for those items endorsed for lifetime.

How to score the items:

Lifetime: Add 1 point for every YES to any of the following items:

1 or 2 3 5 7 8 or 9 10
12 13 14 or 15 or 16 17

Past year: Add 1 point for every YES to any of the following items:

18 or 19 20 22 24 25 or 26 27
29 30 31 or 32 or 33 34

If gambler responds YES to more than one item in a response cluster (e.g., “8 or 9”), count them together as a single point.

Under the NODS typology, a gambler who scores zero points is a low-risk gambler, and one who scores a one or two is an at-risk gambler. Scoring three or four would mean one is a problem gambler, which corresponds to what certain studies have called a “possible pathological gambler.” A gambler who scores five or more on the NODS is a pathological gambler, by DSM-IV criteria.

Lifetime Problems

1. Have there ever been periods lasting two weeks or longer when you spent a lot of time thinking about your gambling experiences or planning out future gambling ventures or bets?
   YES
   NO

2. Have there ever been periods lasting two weeks or longer when you spent a lot of time thinking about ways of getting money to gamble with?
   YES
   NO
