

Legend

Doses per Patient

Map Information:

This map displays the number of prescription benzodiazepine doses dispensed per patient in each county in 2012. Per patient measures are based on the number of individuals in the county who received benzodiazepine prescriptions.

The 2012 statewide average doses dispensed per patient was 253.2. The counties with the highest numbers of dispensed doses per patient were Lawrence county (337.1), Guernsey county (327.0), and Muskingum county, (326.9). The counties with the lowest numbers of dispensed doses per patient were Delaware county, (183.9), Ashland county (187.5), and Geauga county (188.4).

Per patient rates are based on oral solids. County borders are outlined in gray. ADAMHS Boards areas are outlined in black, and may overlap county borders.
