

Treatment for Opiate Use Disorder

Percentage of Unduplicated Clients in SFY 2015

Legend

Percentage of clients

Map Information:

This map represents the percentage of unduplicated clients with a primary diagnosis of opiate use disorder (OUD) served in each county during SFY 2015. The average rate of clients with a primary diagnosis of OUD across counties was 43.7%. The highest rates were found in Lawrence county (84.3%), Scioto county (81.6%), and Gallia county (70.2%), all located in the southern tip of the state. The lowest rates were found in Coshocton county (17.5%), Holmes county (19.3%), and Tuscarawas county (19.8%), all located in the eastern central area of the state.

All counties reported 25 or more clients. Counties with 25-49 clients are signified by diagonal lines.

County borders are outlined in gray. ADAMHS Boards areas are outlined in black, and may overlap county borders.
