Hepatitis C Rates in Ohio

2003 Annual Summary of Infectious Diseases

Legend

Rate per 100,000

- 0.0 - 20.3
- 20.4 - 47.0
- 47.1 - 85.8

Map Information:

This map represents the number of reported Hepatitis C cases (past or present, non-acute) per 100,000. Hepatitis C is a liver disease caused by the Hepatitis C virus (HCV). Intravenous drug use is the leading risk factor for HCV infection. In 2003, the highest rates of HCV were in Franklin County (85.8), Hamilton County (76.4) and Scioto County (75.1).
