

Hepatitis C Rates in Ohio

2009 Annual Summary of Infectious Diseases

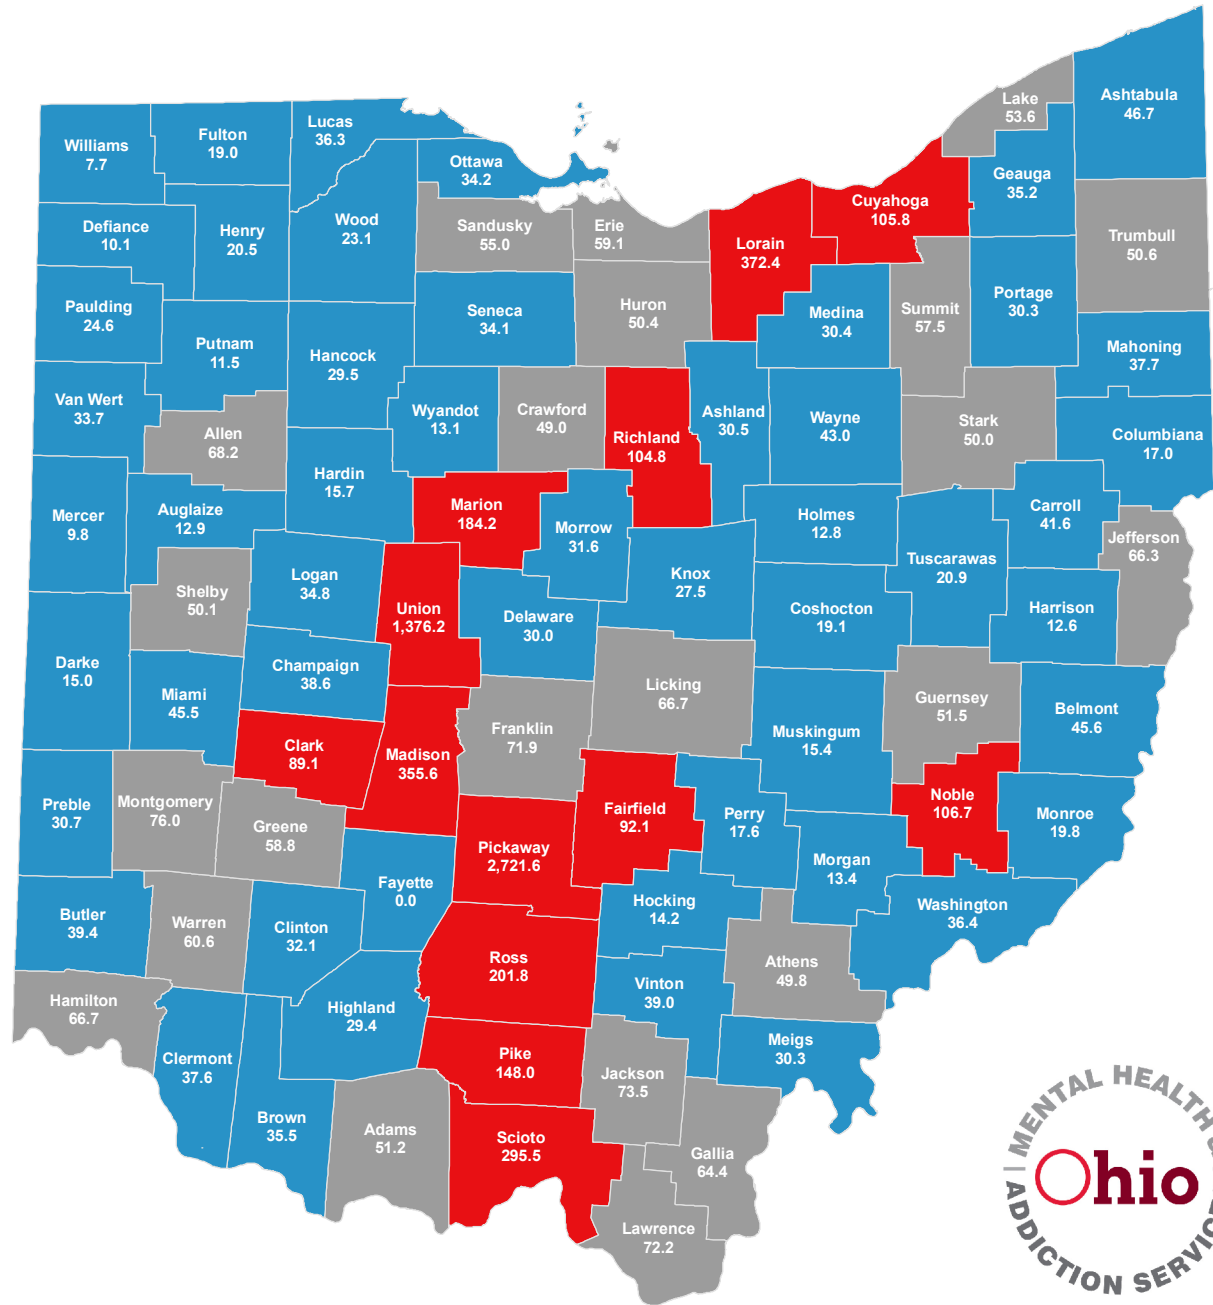

Legend

Rate per 100,000

Map Information:

This map represents the number of reported Hepatitis C cases (past or present, non-acute) per 100,000. Hepatitis C is a liver disease caused by the Hepatitis C virus (HCV). Intravenous drug use is the leading risk factor for HCV infection. In 2009, the highest rates of HCV were in Pickaway County (2,721.6), Union County (1,376.2) and Lorain County (372.4).
