Map Information:

This map examines change in morphine milligram equivalents (MMEs) per patient from 2013 to 2014. Most prescription analgesics in the OARRS system (>97%) have a morphine equivalence as established by the Centers for Disease Control. On average, MMEs per patient decreased by 4.3 percent during this time. Counties experiencing the greatest decrease in MMEs per patient were Mahoning (-14.3%), Noble (-13.4%) and Adams (-11.5%). Counties experiencing the greatest increase in MMEs per patient were Erie (2.3%), Carroll (1.7%) and Hardin (1.5%).

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
