# Hospital Services

### Mission

The mission of the Ohio Department of Mental Health and Addiction Services (OhioMHAS) is to provide statewide leadership of a high-quality mental health and addiction prevention, treatment and recovery system that is effective and valued by all Ohioans.

### Vision

OhioMHAS will be a national leader in implementing a comprehensive, accessible, and quality-focused system of addiction and mental health care and wellness for all Ohio citizens.

John R. Kasich, Governor • Tracy J. Plouck, Director  
Dave Colletti, Assistant Director, Hospitals  
Mark A. Hurst, M.D., Medical Director

State-run Regional  
Psychiatric Hospitals are  
modern, specialized facilities  
providing short-term and  
intensive treatment  
linked to community  
needs and priorities.

**Recovery** is a personal process that involves overcoming the negative impact of a psychiatric disability despite its continued presence. In a recovery-oriented system, mental health consumers rebuild meaningful lives while receiving supportive services that help them decrease their dependence on the system. People can and do recover from mental illness.

## Access, Safety and Quality are focus of Ohio's Regional Psychiatric Hospitals

Ohio's Regional Psychiatric Hospitals are dedicated to caring for people in need by providing quality and effective psychiatric health services. The Ohio Department of Mental Health and Addiction Services operates six Regional Psychiatric Hospitals across the state. Our responsibility to provide psychiatric hospital care is defined in Ohio's constitution.

Working in collaboration with County Mental Health and Recovery boards and community agencies, expert services built on evidence-based best practices are provided. Hospital services focus on maximizing the potential for recovery so people with mental illness will be successful and satisfied upon discharge.

Hospital staff are committed to providing the highest level of care and safety to patients and their families. As part of that commitment, each hospital is in compliance with the national standards for hospitals set by The Joint Commission and the Centers for Medicare and Medicaid Services. All six psychiatric hospitals are fully accredited and certified by these standard setting organizations. ODMH encourages patients and their families to report concerns about safety and quality to the hospital.

Our Regional Psychiatric Hospitals provide modern, short-term and intensive treatment for acute care patients. We also assess and treat people referred by criminal courts.

### • Acute Care •

The goal of Acute Care is to ensure that patients in our hospitals receive high quality effective treatments. Patients' progress is monitored closely to determine if continued hospitalization is needed or if a less restrictive setting would be more appropriate to foster healing and recovery.

### • Forensic Care •

The goal of Forensic Services is to facilitate the admission, treatment and discharge of people who are ordered to undergo hospitalization by the criminal court system. Patient progress toward recovery is evaluated regularly by the hospital clinicians to coordinate the patient's treatment and movement requirements with the committing courts. Staff members work with families, patients and community agencies to ensure the safety of the patient and the community throughout all stages of treatment.

Promoting wellness and recovery

## Patient Information

### How do I get admitted to a hospital?

Most people are admitted through local community mental health centers that have arrangements for this responsibility with the county Alcohol, Drug Addiction and Mental Health boards and our hospitals. Admissions typically occur through the mental health center's crisis service. Patients are also referred to our hospitals by the county criminal courts when legal charges are involved.

### How long do I stay?

The typical acute care stay is 10 - 20 days, depending upon your response to treatments. You will be treated as an individual and your length of stay questions can be discussed with your physician and treatment team.

If you are referred by a committing court where legal charges are pending, your length of stay can vary between a few weeks to several months. It is the court that has final approval of any discharge or conditional release.

### What happens when I leave?

Prior to discharge, your treating physician, registered nurse and social worker will consult with you, your case manager and/or family members to arrange for a continued care plan based on your needs and input. That plan will consider your total health, living situation and medication needs. The clinical staff members in our hospitals want to make sure your success with inpatient treatment is followed by success after discharge to outpatient care.

### What rights do clients have?

To reach our Clients Rights office, or for information and referral, call toll free **1-877-275-6369** or **1-888-636-4889 TTY**. Our website includes a page of Client Rights Information Links, which lists state and local organizations that help consumers and their families understand their illness, their rights and the mental health system.
