

OhioMHAS Bureau of  
Correctional Recovery Services

Mike DeWine, Governor  
Lori Criss, Director

# OUTCOME SUMMARY

## FISCAL YEAR 2019

*"My counselors listened to me. They had a positive energy and gave me a healthy perspective about life and what recovery should look like."  
Leo (Recovery Services Program Participant)*

*"To me, being enlightened about my criminal thinking errors was the most impactful part of treatment. Learning about my thinking and getting outside of my old ways made it all worthwhile."  
DaVaughn (Recovery Services Program Participant)*

## Bureau of Correctional Recovery Services

### Mission Statement

To provide evidenced-based treatment, which teaches the skills necessary for offenders to remain drug free upon release to the community.

### Community Partners

#### CompDrug, Inc., Columbus, Ohio

TAPESTRY Therapeutic Community at Ohio Reformatory for Women

OASIS Therapeutic Community at Pickaway Correctional Institution

Conquest Therapeutic Community at Chillicothe Correctional Institution

Stepping-Stones Therapeutic Community at Grafton Correctional Institution

VISTA Therapeutic Community at Madison Correctional Institution

SHIELD Therapeutic Community at Noble Correctional Institution

#### Community Assessment Treatment Services, Cleveland, Ohio

Recovery Services Treatment at Northeast Reintegration Center

#### Alcoholics Anonymous

#### Narcotics Anonymous

#### Cocaine Anonymous

#### Dual Recovery Anonymous

#### Celebrate Recovery

The Ohio Department of Mental Health and Addiction Services (OhioMHAS), along with the Ohio Department of Rehabilitation and Correction (ODRC) have formed a partnership which leverages the combined expertise of both agencies in order to provide improved treatment within the prisons and ensure a better connection to clinical and recovery supports for offenders upon release.

OhioMHAS is committed to providing a comprehensive continuum of substance use disorder (SUD) treatment services. The continuum begins at ODRC reception centers where offenders receive a SUD screening. For offenders with SUD problems identified by the screening, the next phase of the SUD treatment continuum is provided at parent institutions. A variety of treatment services are offered based on the institutional mission, facility capacity and staffing. Offender participation in these programs is completely and strictly voluntary.

Upon completion of a treatment program, the OhioMHAS staff work with the offender to develop a continuing care plan. This plan will include participation in institutional SUD aftercare activities while incarcerated and a referral to community care when released. SUD services for offenders under DRC supervision in the community are coordinated by eight chemical dependency specialists (CDS). The CDSs are responsible for developing treatment resources, making referrals and providing SUD assessments and interim services to aid with transition back into the community/society. Those who are not on supervision and who have engaged in Recovery Services treatment will be referred to the Community Transition Program.

## Recovery Services Initiatives

The link between substance use and criminal activity has been well documented. Research shows the treatment of drug abusing offenders while incarcerated can be very effective. Additional research also shows treatment gains while incarcerated can be diminished unless follow-up services are utilized in the community.

The following initiatives comprise the Bureau of Correctional Recovery Services' efforts to provide a seamless system of transition to the community for offenders who have completed SUD treatment while incarcerated:

**NARCAN Project** - Naloxone, sold under the brand name Narcan, is a medication used to block the effects of opioids, especially in overdose. OhioMHAS and ODRC have partnered to provide inmates with a Narcan Nasal Spray kit upon release from incarceration. The inmates are provided education on opioid effects, risks and overdose potential. They are also given instruction on how to use Narcan Nasal Spray in the event of an opioid overdose post release.

**Medication-Assisted Treatment (MAT)** - (MAT) is the use of FDA-approved medications, in combination with counseling and behavioral therapies, to provide a "whole-patient" approach to the treatment of SUDs. OhioMHAS and DRC have partnered to implement an initiative focused on combating the opiate epidemic. Individuals qualifying for treatment with an alcohol dependence disorder and/or an opioid dependence disorder may receive their initial injection of naltrexone (Vivitrol) prior to release. They are then provided with extensive re-entry services to support their continued recovery upon release.

**Chemical Dependency Specialists (CDS)** - They ensure that offenders are appropriately linked with community aftercare services. A total of eight CDS staff are located throughout the state. CDS staff is responsible for:

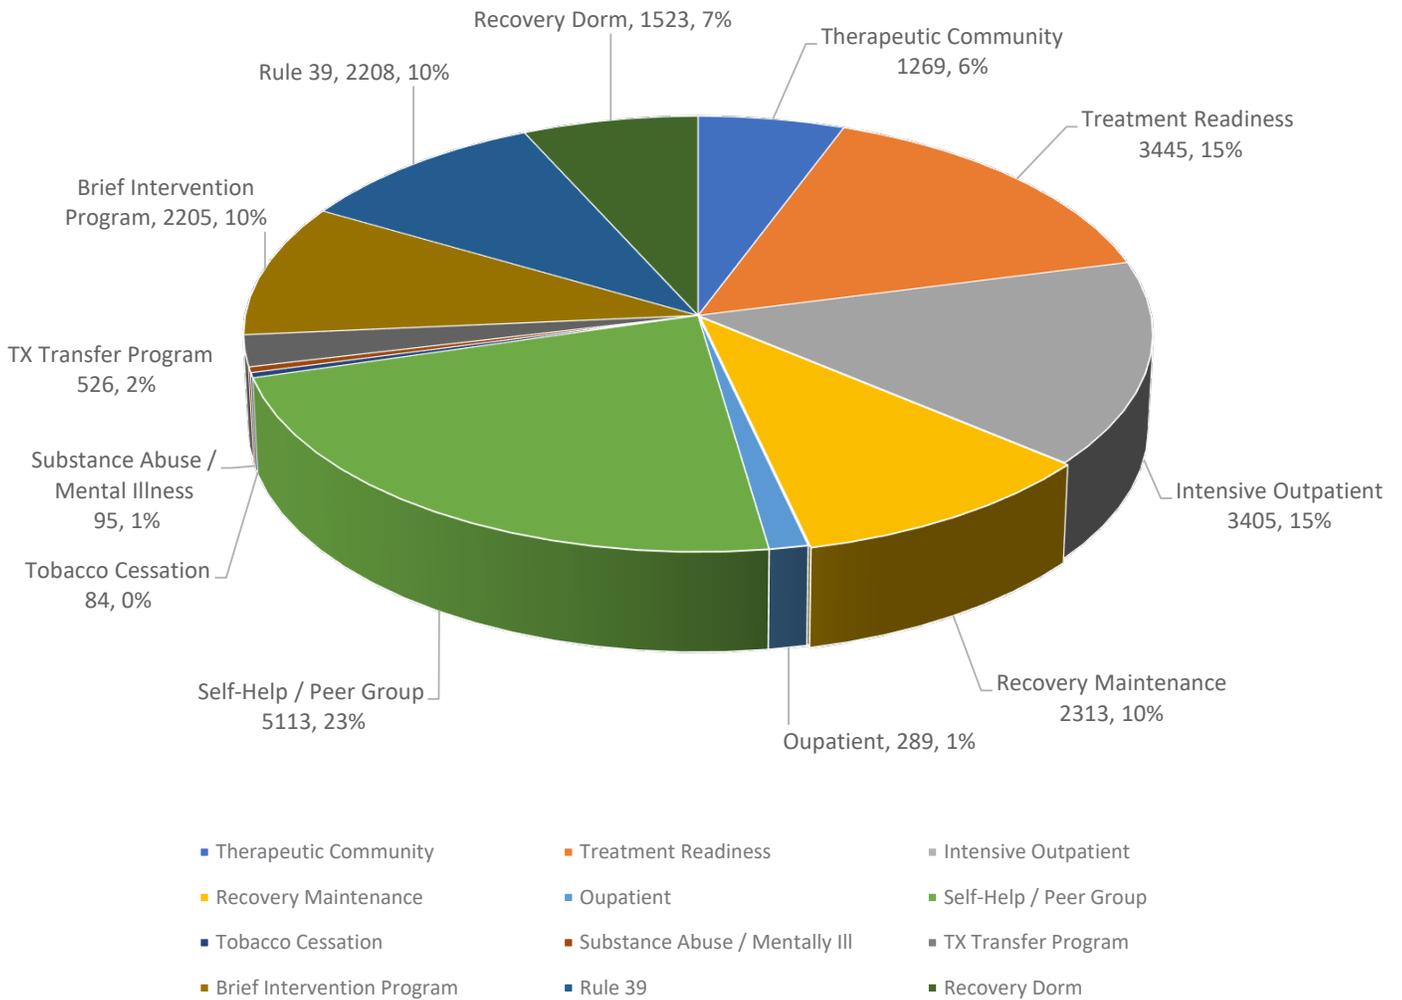

- assessing offender needs
- referring to support and treatment activities
- increasing access to community SUD programs
- conducting some direct treatment
- providing crisis intervention

**Community Transition Program (CTP)** - This program expands existing community capacity to continue treatment services and provide access to recovery supports for individuals with SUDs returning to the community. CTP supports may provide access to housing resources, vocational services, peer support and other nontraditional recovery services.

**Therapeutic Community (TC) Alumni Associations** - The Therapeutic Community Alumni Association is composed of women and men who have completed a OhioMHAS-ODRC TC program and returned to the community. Its goal is to help offenders continue personal growth and remain in recovery. Groups meet regularly in several Ohio cities to discuss projects and activities in which they can support each other, encourage and be role models for those women and men currently participating in one of the six TC programs, and give back to the community.

**Winners Circles** - These groups create a means for ex-offenders to live safe, sober and crime-free lifestyles. Together, members develop pro-social tools to apply to problems related to addiction and criminal activity. Groups meet on a weekly basis to discuss the challenges and complexities of life unique to people who have been incarcerated.

**Participant Engagements with OhioMHAS SUD Treatment Programs & Services in FY 2019**  
**Total = 22,475**

## Definitions

**Brief Intervention Program** - A six-week, 24-hour cognitive behavioral program that uses evidence-based strategies to assist inmates as they work to make positive changes in their criminogenic thoughts and behaviors and patterns of substance use.

**Intensive Outpatient Program (IOP)** - The Intensive Outpatient Program is a 144-hour program that provides treatment services delivered daily for a minimum of 12 hours a week. A minimum of ten of the hours of the program must be cognitive behavioral treatment specific. The remaining hours consist of ancillary services.

**Outpatient Services (OP)** - Treatment Services that are provided less than eight hours per week in regularly scheduled sessions for program participants who reside in general population.

**Recovery Dorm** - A prosocial, recovery-focused unit with a supportive environment for recovery. Treatment groups could also be provided in these units.

**Recovery Maintenance Program** - Recovery services provided following the successful completion of the Recovery Services Intensive Outpatient Program that consists of two 1-hour, or one 2-hour professionally facilitated group meetings per week for a total of eight weeks (16 sessions).

**Recovery Services Level of Care (RSL)** - Designates the level of need for SUD Services: R0 = None, R1 = Minimal Need, R2 = Moderate Need, R3 = Considerable Need.

**Rule 39 Intervention Program** - An intervention for offenders found guilty of institutional Rule 39 violations (positive urine screen). The intervention is offered as part of their sanction. Recovery Services will facilitate this intervention. The intervention is a tool to help start the process of making positive life change. During the process participants are screened to determine their eligibility, appropriateness and motivation to later engage in an Intensive Recovery Services treatment program. Participants attend class two days weekly for two-hour sessions for a four-week duration. This open-ended class allows for referrals to be added at any time.

**Self-Help/Fellowship/Alcoholic Anonymous (AA)/Narcotics Anonymous (NA) Meetings** - Independent support/fellowship groups organized by and for drug abusers and alcoholics to help members achieve and maintain abstinence and/or cope with the effects of drugs and alcohol.

**Substance Abuse and Mental Illness (SAMI) Intensive Outpatient Program** - is made up of 3 distinct programs consisting of a 28-hour SAMI Treatment Readiness program, an 84-hour SAMI Intensive Outpatient program and a 24-hour SAMI Recovery Maintenance program. Each intensive program is delivered for a minimum of six hours weekly and involves additional hours of supplemental services. SAMI Recovery Maintenance is delivered two hours weekly. SAMI focuses on service delivery to individuals identified as dually diagnosed and seeking substance abuse treatment, while also involved with mental health services. Recovery Services and other OhioMHAS staff co-facilitate SAMI treatment.

**Substance Abuse/Mental Illness Non-Intensive Program** - SAMI Non-Intensive is a 12-week education group that involves various mental health and substance use focused topics and related exercises. Groups meet one time weekly for up to two-hour session

## Definitions, continued

**Substance Use Disorder (SUD) Education Services** - A SUD service that explains consequences and effects of substance use. This service can be used for ancillary programming and can be offered to general population inmates. When this service is used as ancillary programming for IOP participants it must be facilitated by licensed Recovery Services staff members. When this service is used for general population inmates it may be facilitated by either licensed Recovery Services staff members, institution staff or volunteers.

**Texas Christian University Drug Screen 5 (TCU)** - An instrument that identifies individuals with a history of drug use or dependency and who therefore should be eligible for treatment options.

**Therapeutic Community (TC)** - A treatment modality that uses an offender hierarchy in which treatment stages are used to reflect personal and program growth.

**Treatment Readiness Program (TRP)** - The TRP is a 48-hour program delivered daily for a minimum of 12 hours a week. A minimum of 10 of the hours must be cognitive behavioral treatment specific. The remaining hours consist of ancillary services. This program incorporates the stages of change model to focus on participant motivation and readiness that will enhance treatment engagement and retention. This program is offered to Recovery Services level 2 and 3 inmates.

**Treatment Transfer Program** - A four-week treatment program that is a component of the Treatment Transfer initiative specified in HB64. It administers the TRP program to eligible inmates

**Voluntary Tobacco Cessation Program** - A structured voluntary program of education, group discussion, counseling, peer support and written assignments to assist inmates in achieving a tobacco-free lifestyle.

**Participant Engagements with OhioMHAS SUD Treatment Programs & Services in FY 2019**  
**Total = 22,475**
