Rehabilitation and Correction

Ohio Department of Mental Health and Addiction Services

Bureau of Correctional Recovery Services Outcome Summary Fiscal Year 2018

**John R. Kasich
Governor**

**Tracy Plouck
Director**

**John Sexten, Chief
Bureau of Correctional Recovery Services**

**Selena DeLozier, Program Administrator
Report Coordinator**

“My counselors listened to me. They had a positive energy and gave me a healthy perspective about life and what recovery should look like.” – Leo (Recovery Services Program Participant)

“To me, being enlightened about my criminal thinking errors was the most impactful part of treatment. Learning about my thinking and getting outside of my old ways made it all worthwhile.” - DaVaughn

Bureau of Correctional Recovery Services Mission Statement:

To provide evidenced-based treatment, which teaches the skills necessary for offenders to remain drug free upon release to the community.

Overview

The Ohio Department of Mental Health and Addiction Services along with the Ohio Department of Rehabilitation and Correction have formed a partnership which leverages the combined expertise of each agency in order to provide increased treatment within the prisons and ensure a better connection to clinical and recovery supports for offenders upon release.

The Ohio Department of Mental Health and Addiction Services (OhioMHAS) is committed to providing a comprehensive continuum of alcohol and other drug (AOD) treatment services. The continuum begins at Ohio Department of Rehabilitation and Correction (DRC) reception centers where offenders receive an AOD screening. For offenders with AOD problems identified by the screening, the next phase of the AOD treatment continuum is provided at parent institutions. A variety of treatment services are offered based on the institutional mission, facility capacity and staffing. Offender participation in these programs is completely and strictly voluntary.

Upon completion of a treatment program, the OhioMHAS staff work with the offender to develop a continuing care plan. This plan will include participation in institutional AOD aftercare activities while incarcerated and a referral to community care when released. AOD services for offenders under DRC supervision in the community are coordinated by eight Chemical Dependency Specialists (CDS). The CDS's are responsible for developing treatment resources, making referrals and providing AOD assessments and interim services to aid with transition back into the community/society. For those not on supervision and who have engaged in Recovery Services treatment they will be referred to the Community Transition Program.

Celebrate Recovery

Recovery Services Reentry Initiatives

The link between substance abuse and criminal activity has been well documented. Research shows the treatment of drug abusing offenders while incarcerated can be very effective. Additional research also shows treatment gains while incarcerated can be diminished unless follow-up services are utilized in the community.

The following initiatives comprise the Bureau of Correctional Recovery Services' efforts to provide a seamless system of transition to the community for offenders who have completed AOD treatment while incarcerated:

- NARCAN Project

Naloxone, sold under the brand name Narcan, is a medication used to block the effects of opioids, especially in overdose. OhioMHAS and DRC have partnered on a pilot-project to provide female inmates with a Narcan Nasal Spray kit upon release from incarceration. The inmates are provided education on opioid effects, risks and overdose potential. They are also given instruction on how to use Narcan Nasal Spray in the event of an opioid overdose post release.

- Medication-Assisted Treatment (MAT)

Medication-Assisted Treatment (MAT) is the use of FDA- approved medications, in combination with counseling and behavioral therapies, to provide a "whole-patient" approach to the treatment of substance use disorders. OhioMHAS and DRC have partnered to implement an initiative focused on combating the opiate epidemic. Individuals qualifying for treatment with a alcohol dependence disorder and/or an opioid dependence disorder may receive their initial injection of Naltrexone (Vivitrol) prior to release. They are then provided with extensive re-entry services to support their continued recovery upon release.

- Chemical Dependency Specialists (CDS)

The CDS's are charged with ensuring that offenders are appropriately linked with community aftercare services. A total of eight CDS staff are located throughout the state. CDS staff is responsible for the following:

- assessing offender needs
- refer to support and treatment activities
- increasing access to community AOD programs
- conducting some direct treatment
- crisis intervention

- Community Transition Program

The Community Transition Program (CTP) serves to expand existing community capacity to continue treatment services and provide access to recovery supports for individuals with substance use disorders returning to the community. CTP supports may provide access to housing resources, vocational services, peer support and other non-traditional recovery services.

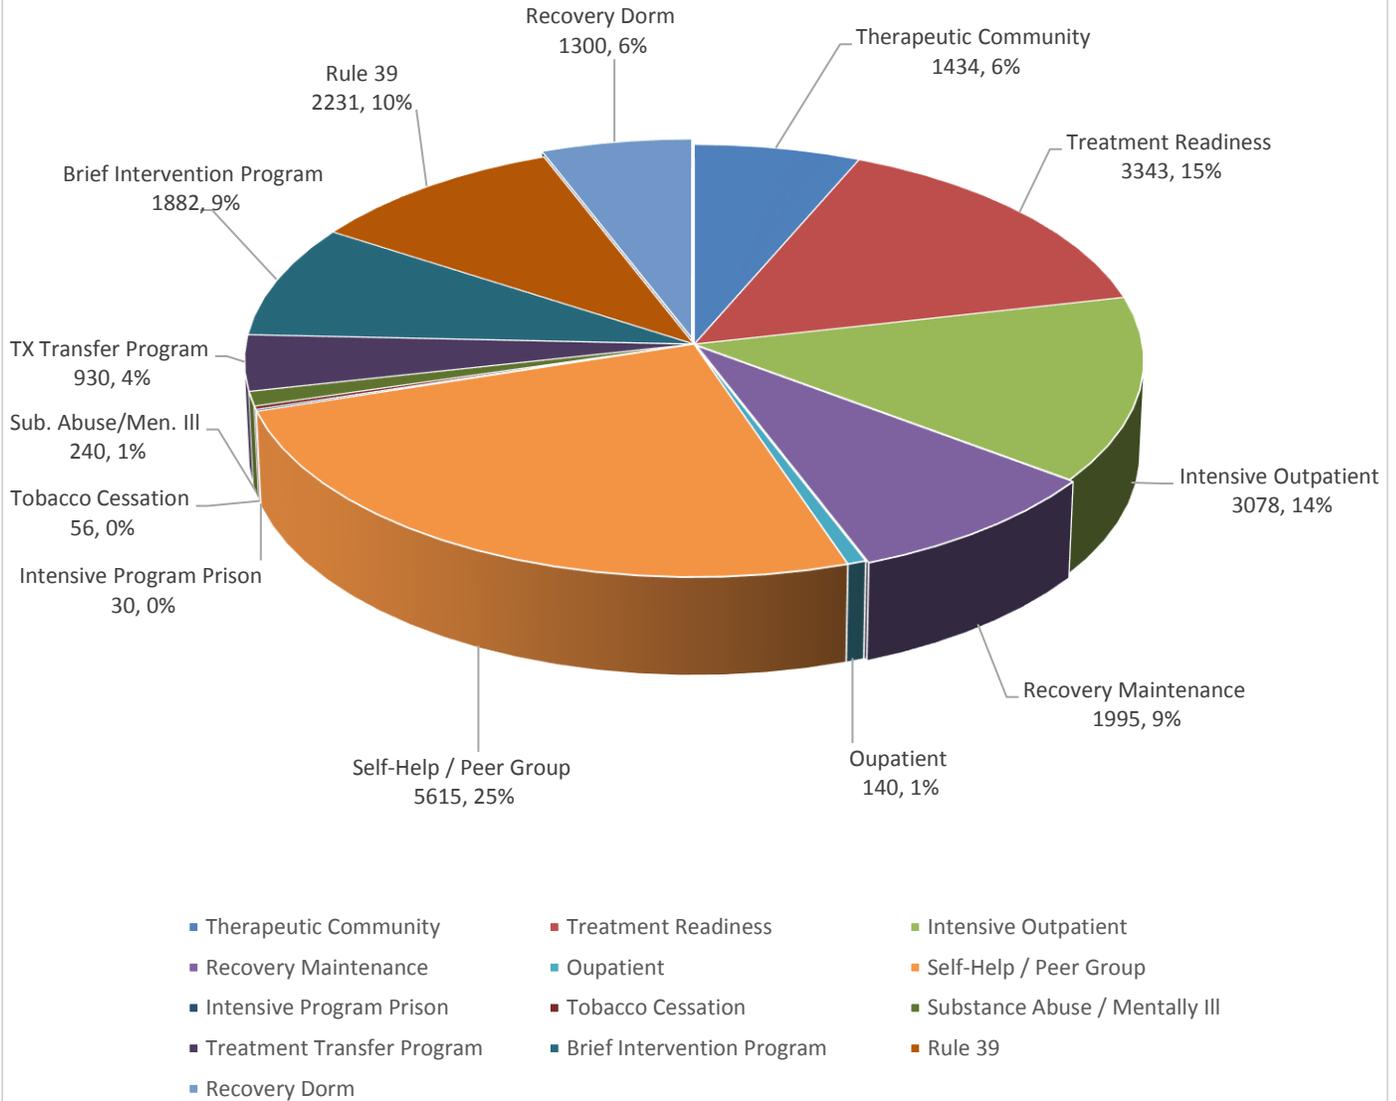

- Therapeutic Community Alumni Associations

The Therapeutic Community Alumni Association is composed of women and men who have completed a OhioMHAS-DRC Therapeutic Community (TC) program and returned to the community. Their goal is to continue personal growth and remain in recovery. They meet regularly in several Ohio cities to discuss projects and activities in which they can support each other, encourage and be role models for those women and men currently participating in one of the six TC programs, and give back to the community.

- Winners Circles

Winners Circles create a means for ex-offenders to live safe, sober and crime-free lifestyles. Together, members develop pro-social tools to apply to problems related to addiction and criminal activity. Groups meet on a weekly basis to discuss the challenges and complexities of life unique to people who have been incarcerated.

Bureau of Recovery Services

Annual Outcome Summary FY 2018

Definitions and Key

Definitions

Alcohol and Other Drug Education Services – An AOD service that helps to deliver the knowledge of the consequences and effects of substance use. This service can be used for ancillary programming and can be offered to general population inmates. When this service is used as ancillary programming for IOP participants it must be facilitated by licensed Recovery Services staff members. When this service is used for general population inmates it may be facilitated by either licensed Recovery Services staff members, institution staff or volunteers.

Brief Intervention Program (Breaking the Cycle) – A 6 week, 24-hour cognitive behavioral program that uses evidence-based strategies to assist inmates as they work to make positive changes in their criminogenic thoughts and behaviors and patterns of substance use.

AOD Treatment Readiness Program - The AOD Treatment Readiness Program is a 48-hour program delivered daily for a minimum of 12 hours a week. A minimum of ten of the hours must be cognitive behavioral treatment specific. The remaining hours shall consist of ancillary services. This program incorporates the stages of change model to focus on participant motivation and readiness that will enhance treatment engagement and retention. This program is offered to Recovery Services level 2 and 3 inmates.

Intensive Outpatient Program (IOP) – The Intensive Outpatient Program is a 144-hour program that provides treatment services delivered daily for a minimum of 12 hours a week. A minimum of ten of the hours must be cognitive behavioral treatment specific. The remaining hours will consist of ancillary services.

Recovery Maintenance Program – Recovery services provided following the successful completion of the Recovery Services Intensive Outpatient Program that consists of two 1-hour, or one 2-hour professionally facilitated group meetings per week for a total of 8 weeks (16 sessions).

Recovery Services Level of Care (RSL) – The Recovery Services level of Care designates the level of need for AOD Services: R0 = None, R1 = Minimal Need, R2 = Moderate Need, R3 = Considerable Need.

Rule 39 Intervention Program - An intervention for offenders found guilty of institutional Rule 39 violations (positive urine screen). The intervention is offered as part of their sanction. Recovery Services will facilitate this intervention. The intervention is a tool to help start the process of making positive life change. During the process participants are screened to determine their eligibility, appropriateness and motivation to later engage in an Intensive Recovery Services treatment program. Participants attend class two days weekly for two-hour sessions for a four-week duration. This open-ended class allows for referrals to be added at any time.

Intensive Program Prison (IPP) – A 90-day program focusing on education, training, work, substance abuse treatment, community service, conservation work, and/or other programs designed to provide intensive programming for eligible inmates in accordance with Ohio Revised Code 5120.32. Upon successful completion of this program, the inmate’s sentence may be reduced to 90 days and the inmate will then serve a transitional type of detention followed by a release under post-release control sanctions or, in the alternative, will be placed immediately under post-release control sanctions.

Outpatient Services (OP) – Treatment Services that are provided less than eight hours per week in regularly scheduled sessions for program participants who reside in general population.

Self-Help / Fellowship / Alcoholic Anonymous (AA) / Narcotics Anonymous (NA) Meetings – An independent support / fellowship group organized by and for drug abusers and alcoholics to help members achieve and maintain abstinence and/or cope with the effects of drugs and alcohol.

Substance Abuse and Mentally Ill (SAMI) – Treatment services that are provided for those inmates determined to have co-occurring substance use and mental health issues.

Texas Christian University Drug Screen 5 (TCU) – The TCU is an instrument that serves to identify individuals with a history of drug use or dependency and who therefore should be eligible for treatment options.

Therapeutic Community (TC) – A treatment modality that uses an offender hierarchy in which treatment stages are used to reflect personal and program growth.

Treatment Transfer Program – A 4-week treatment program that is a component of the Treatment Transfer initiative specified in HB64. This 4-week treatment program entails providing the Treatment Readiness Program phase of the Intensive Outpatient Program to those eligible inmates identified for this initiative.

Voluntary Tobacco Cessation Program – A structured voluntary program of education, group discussion, counseling, peer support and written assignments to assist inmates in achieving a tobacco free lifestyle.
