

Questions related to Emergency Department Grant Application

Number: **MHA-MEDDIR-SIMAP-43**

1. Q: As part of this grant, can we offer \$10 gas cards as an incentive and to reduce the transportation barrier to treatment in a rural area? If not, what other incentives would be approved through the grant?

A: Please ensure your budget meets these specifications: All costs must clearly demonstrate how they are related to the implementation of the selected priority area(s) identified in the county opioid SIM action plan. Costs may be related to staff time for the implementation of the action plan, purchasing equipment needed to address a priority area, training/education, and start-up costs for new service options.

2. Q: Is it an expectation to give details in the budget narrative as to how we arrived at the estimated expenses? We have the information, but we are unclear how to include it if lines cannot be added. It states at the top of the document that the addition of lines is prohibited. It references a "Grant Budget Line Item Policies document" that can be consulted for assistance. Unfortunately, I cannot find it.

A: Please specify what the funds will be utilized for under each budget category. The Budget line item policies document can be found here:
